

# Simplicity

A way of decorating a room by painting the ceilings and walls in one colour, and painting the woodwork in another colour.

This design needs to be done over a minimum of 2 days, subjected to size, the amount of detail in a room and furniture as the ceilings and walls can be spray painted. Woodwork such as doors, door frames and skirtings can be painted on another day.

Including surface protection to protect surfaces such as hard flooring or carpet, sliding/bi-folding doors, sockets, light switches, lighting, windows, window frames and furniture placed into the middle of a room.

Excluding surface preparation such as filling, dustless sanding and caulking.
